---

Hello Stacey:

An example would be a facility that has a weekly monitoring requirement, and they missed a weekly sample. PARIS does not recognize weekends, holidays, and such that allow for changes in the schedule. So frequency of monitoring violations are typically inaccurate and need to be verified manually.

**Subject:** RE: Candidate List

Hi Marc,

I have been reviewing all the sites and checking for the information in PARIS and was wondering what a "frequency of sampling violation" was, this consistently keeps showing up for Edman.
